Re: Petition for Rulemaking Regarding the Transition of Part 22 Cellular Services to  
Geographic Market-Area Licensing (RM-11510)

Dear Ms. Dortch:

On September 21, 2010, CTIA filed an *ex parte* presentation in the above-referenced docket presenting a compromise proposal to transition the cellular band to market-based licensing. A typographical error in CTIA's original filing created an ambiguity as to how the sunset of the Phase II unserved area application process would be triggered. Attached please find a corrected version of CTIA's proposal that makes clear that the trigger for sunset of the Phase II process would occur when 90% of a CMA/Block has been served or when there are no contiguous unserved areas of 50 square miles or greater in the CMA/Block.

If you have any questions, please don't hesitate to contact me.

Sincerely,

/s/ David J. Redl
